## hp designjet 815mfp

With three functions combined, the HP DesignJet 815mfp can copy, scan, and print large documents in colour and black-and-white. All elements of the system are integrated to ensure a seamless workflow that saves workspace and is intuitive to operate.

Perfect for GIS users like cartographers, engineers in oil and gas exploration and mining, civil engineers, land planners and professionals in the utilities, telecommunication and government departments, who need to copy, scan and print large format documents with consistent colours, sharp, accurate contour lines and high image quality. The HP DesignJet 815mfp's integrated design also makes it ideal for those print service providers who need an easy-to-use solution to expand their business.

Makes light work of all your large format colour tasks with this fully integrated multifunction unit.

- Create copies of your essential colour documents on paper or on electronic format with the latest scan software.
- Scan large illustrations, photos and drawings up to 1092 mm (43 inches) wide, and up to 15 mm (0.6 inch) thick.
- Scan originals with 424 dpi optical and 2400 dpi enhanced resolution and a line accuracy of 0.15%.
- Make precise copies of high-quality resolution up to 2400 x 1200 dpi using HP Colour Layering Technology.
- Print on a wide variety of media up to 1106mm (42 inches) wide.

Increase efficiency with fast, accurate scanning so you can move on easily to the next task.

- Quickly digitise colour documents scans at 38 mm (1.5 inches) per second, and black-and-white scans at 76 mm (3 inches) per second\*\*.
- Scan scanned files on a CD or on the network, for further manipulation using the most common file formats including PDF, TIFF or JPEG.
- Use advanced colour management, image enhancement and calibration features to get the best copies.
- Get perfect copies using colour correction features to sharpen, soften and blur the image and produce clean and crisp scans every time.

Easy and intuitive operation of the all-in-one functions lets you get going quickly.

- Get great results from the intuitive and user-friendly touchscreen display.
- The graphical interface takes you through each step to produce the type of document or file you need.
- Ensure maximum consistency between originals and copies with the automatic colour calibration.
- Features like a print list application enable you to free up your time by printing scanned jobs in unattended batches.
- Use the multifunction system as a standalone device or easily plug it into your workflow.

\* Maximum scanning: A1 image with black text graphics at 200 dpi; colour scanning: A1 fully tiled colour image at 200 dpi, 60 sec/80%

Automatic size detection works through a prescan of the original and copying thus requires more time than with manual size settings. See how do I scale copies on page 11. See how do I change the

insertion slot height on page 8. The scanner's transport rollers grip more evenly with center loading. Flexible media will usually be stitched correctly regardless of thickness. A Scale factor of 100% makes a 11 duplicate. Below 100% reduces the image in the copy and above 100% magnifies it. To change See tell me about accounting on page 69. This feature allows you to finetune your settings as you watch them take effect before committing the copy to print. No matter what zooming level you start from, the Zoom All tool resizes the image so that it exactly fits in the Zooming takes place If you need to enlarge the image further, then continue to press the Zoom In button until you get the required level of detail in the view. If you need to decrease the image further, then When a section is touched, the closest frame side or corner is resized to the new position.

Imagine you are gripping hold of the image and dragging it around inside the window. The image shifts so that the point you selected becomes repositioned in the center of the screen. This method is especially useful when zooming in on image details. It lets you pick out important spots and center on them before zooming in. Imagine you are gripping hold of the frame and dragging it around over the image. The frame shifts so that it positions itself with the point you selected directly in its center. This method is especially useful when you are making spot test strips for outputting on the printer. It lets you continuously and rapidly reposition the frame on important areas that you want tested. Correcting this does not mean you have to reload the original and start again. This option allows you to leave the system working overnight or frees you to take care of other tasks. All the previewing and enhancement options available for single document copying are also available when using Collate Copy. See tell me about accounting on page 69. Each new set will be started on a new strip and thereafter nested individually. Your Output size value is set to the size you want for the end result that is, the size of the total image after the panels are assembled. Paneling can be used with both Scantoprint copying and with Print fromfile copying through the Print tab. See also how do I maintain the print list on page 22. Clicking on a folder name will move you onto its level. Only empty folders can be deleted. You can then go through the list manually and unselect unwanted files. You can also put only one file in your list if you want to print a single file. If the list is empty or it needs changing, then you will have to select files and build your list. See how do I set up a print list on page 19. The current Setup tab settings such as Margins, Layout, Printer and Media Profile will apply to the whole print job. See tell me about accounting on page 69.
